Proceedings (Mathematical Sciences) Volume 101, 1991

SUBJECT INDEX

Algebraic cycles
Curves on threefolds with trivial canonical bundle 199
Algebraic threefolds
Curves on threefolds with trivial canonical bundle 199
Anisotropic algebraic group
Congruence subgroup problem for anisotropic groups over semilocal rings 87

Bilateral generating functions
An extension of bilateral generating functions of modified Laguerre polynomials 43
Bilateral generating functions for Jacobi polynomials 49

Completely positive maps
Complete positivity, tensor products and C*-nuclearity for inverse limits of C*-algebras 149
Continuous dependence
Continuous dependence for integrodifferential equations with infinite delay 195
Convex function
On integrability of power series 121
Subordination properties of certain integrals 219
Convexity
Uniformly non-$l_n^{(1)}$ Musielak-Orlicz sequence spaces 71

Differintegral operators
A note on the multidimensional Weyl fractional operator 179
Differential subordination
Subordination properties of certain integrals 219
Diffraction of elastic waves
Scattering of antiplane shear wave by a propagating crack at the interface of two dissimilar elastic media 183

Entire functions
On the ratio of the maximum term and the maximum modulus of the sum of two entire functions 19
Equivariant maps
On continuous maps between Grassmann manifolds 111
Extended Jacobi polynomials
Integrals involving Fox's H-function 37

Fluid particle suspension
Linear flow induced in fluid particle suspension by an infinite differentially rotating disk 25

g-functions
A multiplier theorem for the sublaplacian on the Heisenberg group 169
Generalized polynomials
Integrals involving Fox's H-function 37
Generating relations
Bilateral generating functions for Jacobi polynomials 49
Global field
Congruence subgroup problem for anisotropic groups over semilocal rings 87
Grassmann manifolds
On continuous maps between Grassmann manifolds 111

H-function
Integrals involving Fox's H-function 37
Hausdorff metric
On the convergence properties of measurable multifunctions with values in a separable Banach space 63
Heisenberg group
A multiplier theorem for the sublaplacian on the Heisenberg group 169
Hitchin model
Self-dual connections, hyperbolic metrics and harmonic mappings on Riemann surfaces 215
Homogeneous spaces
Asymptotic behaviour of trajectories of unipotent flows on homogeneous spaces 1

Infinite delay
Continuous dependence for integrodifferential equations with infinite delay 195
Infinite series
On the $|\bar{N}, P_n|_k$ summability factors for infinite series 143
Integrability of power series
On integrability of power series 121
Integrodifferential equation
Continuous dependence for integrodifferential equations with infinite delay 195

Intermediate Jacobian
Curves on threefolds with trivial canonical bundle 199
Inverse limits of C*-algebras
Complete positivity, tensor products and C*-nuclearity for inverse limits of C*-algebras 149

Jacobian polynomials
Bilateral generating functions for Jacobi polynomials 49
Jensen's inequality
On integrability of power series 121

Kuratowski-Mosco convergence
On the convergence properties of measurable multifunctions with values in a separable Banach space 63

Laguerre series
Summability of Laguerre series at the point $x = 0$ 55
Linear Ekman layer
Linear flow induced in fluid particle suspension by an infinite differentially rotating disk 25
Littlewood-Paley-Stein theory
A multiplier theorem for the sublaplacian on the Heisenberg group 169

Matrix summability
Summability of Laguerre series at the point $x = 0$ 55
Maximum modulus
On the ratio of the maximum term and the maximum modulus of the sum of two entire functions 19
Maximum term
On the ratio of the maximum term and the maximum modulus of the sum of two entire functions 19
Modified Laguerre polynomials
An extension of bilateral generating functions of modified Laguerre polynomials 43
Multidimensional Laplace transform
A note on the multidimensional Weyl fractional operator 179
Multidimensional Weyl operator
A note on the multidimensional Weyl fractional operator 179
Multiplier algebras
Complete positivity, tensor products and C*-nuclearity for inverse limits of C*-algebras 149
Multiplier theorem
A multiplier theorem for the sublaplacian on the Heisenberg group 169
Musielak-Orlicz sequence space
Uniformly non-$l_n^{(1)}$ Musielak-Orlicz sequence spaces 71

Normal subgroup structure
Congruence subgroup problem for anisotropic groups over semilocal rings 87
Nuclear C*- and nuclear pro-C*-algebras
Complete positivity, tensor products and C*-nuclearity for inverse limits of C*-algebras 149
Nuclear space
Complete positivity, tensor products and C*-nuclearity for inverse limits of C*-algebras 149

Orthogonal polynomials
Bilateral generating functions for Jacobi polynomials 49

Pic(R), U(R)
The seminormality property of circular complexes 227
Porous medium
Linear, hydrodynamic flow in a rotating saturated porous medium 127
Propagating crack
Scattering of antiplane shear wave by a propagating crack at the interface of two dissimilar elastic media 183

Rank
On the ratio of the maximum term and the maximum modulus of the sum of two entire functions 19
Rational curves
Curves on threefolds with trivial canonical bundle 199
Reflexivity
Uniformly non-$l_n^{(1)}$ Musielak-Orlicz sequence spaces 71
Riemann surfaces
Self-dual connections, hyperbolic metrics and harmonic mappings on Riemann surfaces 215
Rotation
Linear flow induced in fluid particle suspension by an infinite differentially rotating disk 25
Linear hydrodynamic flow in a rotating saturated porous medium 127

SH-wave
Scattering of antiplane shear wave by a propagating crack at the interface of two dissimilar elastic media 183
Seminormal
The seminormality property of circular complexes 227

Set valued Radon-Nikodyn derivative
On the convergence properties of measurable multifunctions with values in a separable Banach space 63
Set valued martingale
On the convergence properties of measurable multifunctions with values in a separable Banach space 63
Side wall boundary layers
Linear, hydrodynamic flow in a rotating saturated porous medium 127
Steenrod squares
On continuous maps between Grassmann manifolds 111
Stiefel-Whitney classes
On continuous maps between Grassmann manifolds 111
Stress intensity factor
Scattering of antiplane shear wave by a propagating crack at the interface of two dissimilar elastic media 183
Sublaplacian
A multiplier theorem for the sublaplacian on the Heisenberg group 169
Summability factors
On the $|\bar{N}, p_n|_k$ summability factors for infinite series 143
Support function
On the convergence properties of measurable multifunctions with values in a separable Banach space 63

Tensor products
Complete positivity, tensor products and C*-nuclearity for inverse limits of C*-algebras 149
Trajectories
Asymptotic behaviour of trajectories of unipotent flows on homogeneous spaces 1
Triple hypergeometric series
Bilateral generating functions for Jacobi polynomials 49

Uniformly non-$l_n^{(1)}$
Uniformly non-$l_n^{(1)}$ Musielak-Orlicz sequence spaces 71
Unipotent flows
Asymptotic behaviour of trajectories of unipotent flows on homogeneous spaces 1
Univalent, star-like
Subordination properties of certain integrals 219

Weak convergence of sets
On the convergence properties of measurable multifunctions with values in a separable Banach space 63
